No 43

GOVERNMENT OF MYSORE

OFFICE OF

THE DIRECTOR OF PUBLIC HEALTH

IN MYSORE

BANGALORE

Date July 19, 1943

To

to Government,
Bangalore

Sir

Adverting to Government Order No [illegible] dated [illegible] sanctioning the above estimate, I have the honour to state that the estimate provided for the construction of manholes with 9" thick walls only. But the manholes of greater depths was adopted and there was no tender rate for 1 1/8 had to be constructed, the usual thickness of 1 1/8' manhole [illegible] were therefore treated as non-tendered items and paid for at schedule rates.

In his inspection report on the accounts of the Bangalore City Drainage Division, the Accountant General has taken objection to the above payment stating that proportionate extra cost based on data worked out with reference to the tender of contractor for manhole should have been paid as in the case of the Sub Main No 3 for deeper manholes than those tendered. If the tendered rate for 1 1/2' thick manhole was available for any depth, the rate for other depths could have been arrived at as was done in the case of Sub Main No [illegible] works. These rates could not be applied for in this case for the reason that the tendered rate for 1 1/8' thick manhole for the depth was not available.

Copies of the extract from the Inspection Report, report of the Special Officer and the final observation of the Controller in this effect as reported to Government are enclosed herewith for the information of Government.

I request you to be so good as to obtain the approval of Government to the payment at schedule rates under

GOVT OF MYSORE
GOVT & 1693/L 9 SEP 1943 L S G BRANCH

Sir

Payment at schedule rates for manholes of 7-8 , 8-9 and 10-11 in the work of laying underground drainage in the new layout formed by the srs. Bhajjan Rao and P Subbarama Setty in Data Silk Farm lands

--

With reference to your letter No L 1798/L1 81-43-2 dated 14th August 1943 calling for the detailed data for arriving at a rate of Rs 13-2-0 per foot depth of manholes, I have the honor to enclose herewith the data furnished by the Special Officer, Bangalore City Drainage Division, with a copy of his letter No 63 dated 30th August 1943 As stated by him, the question of granting the rate of Rs 13-2-0 for each additional foot does not arise in the above work as the tendered rates were for manholes of 9 walls up to 7 in depth

I have the honour to be,
Sir,
Your most obedient servant,
W G Macgregor
Director of Public Health

Letter No 63 dated 30th August 1943 from the Special Officer, City Drainage Division, Bangalore to the Director of Public Health in Mysore, Bangalore

--

I have the honour to submit herewith a data sheet giving the rate for foot depth of manholes with 1,1/8 in thick walls as desired in your memo No 353-23/42-43 dated 17th August 1943

In this connection I wish to point out that the question of granting the rate of Rs 13-2-0 for each additional foot does not arise in the Old Data Silk Farm Area, as the sanctioned estimate provided only for manholes with 9 thick walls and tendered rates were called for and were therefore available for manholes of 9 walls up to 7 in depth During execution it was found necessary to construct deeper manholes than 7 and 1,1/8 thickness had to be adopted for the walls of the manholes as tendered rates were not available for 1,1/8' thick manholes, Schedule Rates of the Division had to be paid for the deeper manholes, as already explained in the previous references pertaining to this work
